

Know The Flags

Flags are the only way we can communicate critical information to you while you are on the track. Please check each corner station as soon as you can see it for a flag.

Acknowledge all corner workers with a quick wave or flash your lights. **OBEY** what the flags are telling you!

Session is in progress, track is clear

There is a problem on the course. Drive with caution and slow down. The course may be slippery, there may be debris on the track, or there may be a disabled car on the course. If the yellow flag is being waved, you are close to the problem area. **NO PASSING** while a yellow flag is displayed.

Faster cars behind you need to pass. Displayed only in passing zones. Check your mirrors, slow down, and allow ALL cars to pass. There may be more than one that needs to pass.

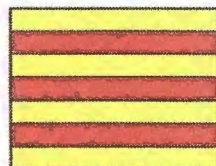

Stop quickly and safely on the track out of the driving line, but in view of the corner worker. Do not stop at blind spots on the track. This flag indicates serious trouble on the course.

This flag will be pointed at the driver at the Turn 10 Flag Station and indicates that incorrect driving procedures have been observed. Acknowledge with a wave or flash of lights. Proceed with caution and enter the pits, report to a pit official. Failure to respond may result in expulsion from the event.

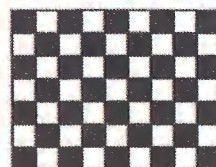

This flag will be pointed at the driver at the Turn 10 Flag Station and indicates that possible mechanical trouble has been observed. Acknowledge with a wave or flash of lights. Proceed with caution and enter the pits, report to a pit official. Failure to respond may result in expulsion from the event.

Surface change. Oil or gravel may have been deposited on the track surface. Proceed with caution.

Cool down lap, last lap before exiting. This flag will probably not be used at this event.

This flag will be displayed at the Turn 6 and Turn 10 Flag Stations and indicates that the session is over. Proceed to the track exit (on your left after Turn 10) and exit at reduced speed to cool down and enter the pits. **NO PASSING.**
